

```
public class MyClass2
{
    public static void main(String args[])
    {
        int[] array = new int[3];
        try
        {
            array[7] = 3;
        }
        catch (ArrayIndexOutOfBoundsException e)
        {
            System.out.println("Array index is out of bounds!");
        }
        finally
        {
            System.out.println("The array is of size " + array.length);
        }
    }
}
```
